Sterile  
Non Sting  
**Medical  
Protective  
Film**

## Protect

Manufactured in the UK by  
Fino Healthcare Ltd

finoderm Protect is a Sterile Non Sting Medical Protective Film designed for the Advanced Wound Care market to protect the peri-wound skin from any negative effects of the adhesives of the required dressings as well as to protect the area from any leaks that may occur onto the skin.

finoderm Protect acts as additional layers of skin so that when any adhesive is removed, there is a reduction in skin stripping taking place. The fully sterile finoderm Range is available in spray, wipes and foam applicators and helps to reduce any pain involved with dressing changes (increasing patient concordance) as well as maintaining healthy skin around the wound and helping to reduce the spread of the wound site.

- Creates a thin and durable protective layer
- Non Sting protective film for Wound care
- Helps to maintain healthy peri-wound skin
- Protects against exudates leaking onto the skin
- Easy to apply
- Dries in seconds
- Fully Sterile Range to ensure Wound healing is not compromised
- Use finoderm Protect in conjunction with finoderm Release to give your skin the protection it deserves
