Intelligent Ostomy Care Solutions

finofilm is a Non Sting Ostomy Protective Film designed with Ostomates in mind to protect the peri-stomal skin from the adhesives of their Ostomy pouches as well as to protect the area from any leaks that may occur onto the skin.

finofilm acts as additional layers of skin so that when any Ostomy adhesive, such as a stoma pouch, base plate or flange, is removed, there is a reduction in skin stripping taking place. finofilm is available in spray, wipe and foam applicators and helps to reduce any pain involved with pouch changing as well as maintaining healthy skin around the stoma.

Use finofilm in conjunction with finopeel to give your skin the protection it deserves.
