

finofilm

finofilm is a non sting Ostomy protective film designed to protect the peri-stomal skin from Ostomy pouch adhesives as well as to protect the area from any leaks that may occur onto the skin. finofilm acts as additional skin layers so that when any Ostomy adhesive such as a stoma pouch, base plate or flange, is removed, there is a reduction in skin stripping, reduced pain and healthy skin round the stoma is maintained.

finofilm is available in spray, wipe and foam applicators.

finosorb

finosorb is a super absorbent gelling agent designed to reduce anxiety and fear caused by issues of pouch bulging, discomfort, leakage, pouch noise and odour. This fast acting product is a water soluble sachet placed directly into the user's Ostomy bag and will change liquid output into a manageable gel.

finosorb is packaged in 60 sachets and is recommended for use by Ileostomates, Colostomates with liquid output and for all Ostomates when travelling.

finopeel

finopeel is a non sting Ostomy adhesive remover to make the removal of pouches, base plates or flanges as simple, quick and pain free as possible.

Due to the nature of the product finopeel will not only ensure Ostomy adhesive is removed from the skin without causing stripping, irritation and trauma but will reduce skin stripping whilst helping the body to maintain healthy skin.

finopeel is available in both spray and wipe options.
