

# TTS ARCHIVE module starter pack

## total traceability system

The MEDITRAX® TTS Archive Module starter pack is designed to quickly, easily and efficiently commence your archive of records. The entire system is dedicated to “finding” not “filing”, remembering that these records prove that your policy and procedures are correct, and they are all that proves it! The system takes into account where the records were originally filed and even if the archival boxes change location, the system can still keep track of what is where. Every time a record is accessed a log is kept of whom and when. The MEDITRAX® TTS Archive Module can also be used as an add-on module to the MEDITRAX® Total Traceability System.

### features : record tracking

### manual recording
