## New Dimensions in Breast Expansion

Integra<sup>®</sup> breast expanders provide unmatched design features and characteristics for optimal results. With the two stage expansion models the Integra breast expanders provide greater lower pole projection to create a more anatomical expansion. Combined with the enhanced surface and optional suture tabs the Integra breast expander will provide you and your patient with the results desired. The Integra breast expanders are available in over 50 standard shapes and sizes but if your patient has unique requirements we are able to design a specialty breast expander to fill your needs. Please contact your PMT product specialist for more information.
