Disposable Single Use Sterile Instruments

Australian Owned Family Medical Company Since 1981

defries industries product range defries industries product range

disposable single use instruments disposable single use instruments

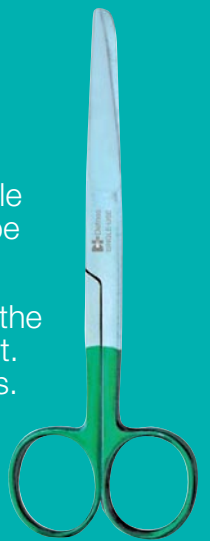

- Defries Industries offers our range of Disposable Single Use sterile Stainless Steel Instruments to hospitals as an alternative to traditional Re-usable Metal Instruments.
- Disposable Single Use Instruments can be utilised by Hospital Wards, Sterilising Departments, Theatre, Emergency Departments, Day Procedure Centre and Medical Clinics.
- Disposable Single Use Instruments save the sterilising department time and money by staff not having to collect instruments from the Wards and replacing them.
- Often expensive instruments are lost or inadvertently discarded, incurring a high replacement cost.
- The costs associated with reprocessing can now be significantly higher than purchasing a Single Use Sterile Instrument.
- By using Disposable Single Use Instruments, there is no water wastage in reprocessing the reusable alternative in the Sterilising Department.
- Single use Disposable Instruments eliminate the expense of Instrument Repair or Sharpening and help reduce the wear and tear on expensive Theatre Re-usable Instruments.

our innovation our innovation

- Defries Industries offer Colour - Coded Disposable Instruments: Green Handles. This identifies to Departments and Sterilizing Services that the instrument is a single use disposable. We can arrange any of our disposable single use instruments to be Colour Coded with Green Handles for your Hospital.
- The Labelling of the Instrument Packs is clear and easily identifies the contents of the Packs. The label also details the Batch Number and Re-order Code of the Product. Patient Piggy Back Labels can also be included for use in Medical Patient Records.
- Defries Industries name and Single Use are etched on each instrument.

our commitment our commitment

- With over 300 different current Disposable Single Use Sterile Instruments available, and numerous configurations for instrument combinations, we are able to meet your needs for Single Use Instruments and Packs.
- If you require a more specialized reusable instrument to be Single Use, Defries Industries are able to duplicate the instrument and offer an equivalent disposable with or without green handles.
- We have a quick turnaround time if you require a customized Instrument Pack. All our Manufacturing and Packaging are completed at Defries Industries in our state of the art clean room and sterilized in Victoria.

Single Use Suture Packs

All Green Handle Instruments Available.
