CUSTOM PROCEDURE PACKS

- A Custom Procedure pack is designed to contain all the consumables used during a procedure.
- The Individual consumables can range from Single Use Drapes and Gowns, to Diathermy, Suction Tubing, Packs and Gauze.
- Defries assembles these custom packs to your hospitals' specifications.

Clinical Cost Savings

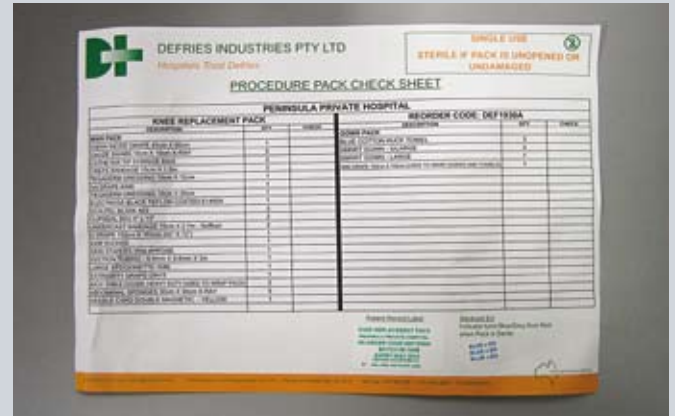

- Custom Packs save setup time for all procedures.
- They ensure all components are available for every procedure.
- A Customised Pack will reduce packaging waste.

- Infection control is maximised by using single use Drapes and Gowns. A reduction in linen ensures minimal lint.
- Custom Packs reduce both inventory and time required to order individual components.
- Emergency cases can be attended to more quickly with a Custom Procedure Pack.
- Our warehouse will hold 3 months stock of Custom Packs, therefore ensuring quick delivery when required.
- Delivery can be to stores or direct to relevant Departments.
- Flexible delivery options can be daily, biweekly or weekly to reduce storage requirements.

Code Description Box Qty.

- Flexibility to change components of Custom Packs.

- Easy traceability of all components in pack.

- Easy accountability of costs per procedure.

Implementation

- Contact your Defries Representative or Customer Service 1300 550 278. We will work with you to discuss the Custom Procedure Pack and components you require.

- Our relationship with our suppliers enables us to competitively quote.
- We now have our own range of Single Use Gowns, Drapes and Plasticware ensuring a complete Defries Custom Pack.
- We offer non sterile or sterile samples, so early changes can be identified.
- Ongoing education and followup is vital with Custom Packs, our Representatives are always available to discuss your specific needs.
