

Secu-Drape®

SENGEWALD 

OR Drape Systems

More Flexibility, more Comfort.

Secu-Drape®

Safety through Secu-Drape®

Highest Quality Medical Products.

Perfect Protection for Patients and Staff

The Sengewald group is the only manufacturer in the world who develops and makes both materials, drape systems and sterilisation packaging themselves.

Since 1979 we have been connecting the needs and professional competence of our customers with our own considerable experience to create innovative, high-grade products.

With our fully automated manufacturing facilities in Rohrdorf we give new meaning to the quality seal of "made in Germany" every day from the material lamination to the finished sterile products.

23 million OR drapes a year speak for themselves – and for us.

The Secu-Drape® Advantages:

- Continuous quality through fully automated manufacturing.
- Flexibility with custom products.
- Safe fluid control because the adhesive zones extend right to the edge of the incision area.
- PP nonwoven for additional strength without a gap in the area of the operating aperture.
- Easy handling due to optimal folding and self-explanatory pictograms.
- Low material weight.
- Flexibility in sterilisation methods (EO and R are possible)

A wide range of customised products – just ask us!

The Basic Nonwoven

Pleasantly soft and extremely absorbent. The typical orange skin structure binds fluids of over six times its own weight.

The Protective Film

The perfect barrier against bacteria. Super soft and absolutely impermeable to fluids. The patient remains dry and is safely protected from infections. The film is extremely light but still exceedingly tear-resistant.

The Patient Layer

This freshly developed nonwoven is even softer and stronger than before. Thanks to the new lamination technique it lays on tiny air cushions on the skin and offers the patient maximum comfort.

Mediwell super strong exceeds the requirements of EN 13795.

The Premium Quality Material: Mediwell super **strong**.

Symbiosis of Comfort and Functionality.

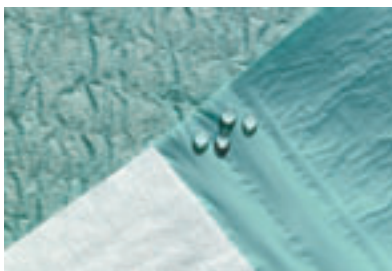

Mediwell

A two or three-ply material combination, absorbent and impermeable to fluids.

Mediwell super

A two or three-ply material combination, extremely absorbent and tear resistant, impermeable to fluids.

Mediwell absorb

A reinforcement nonwoven with a high absorptive capacity, very high rub resistance when wet, impermeable to fluids.

Colordrape

A turquoise, very drapeable, micro-embossed PE coex film, impermeable to fluids.

Filmdrape

A transparent, very drapeable, micro-embossed PE coex film, impermeable to fluids.

Mediwell light

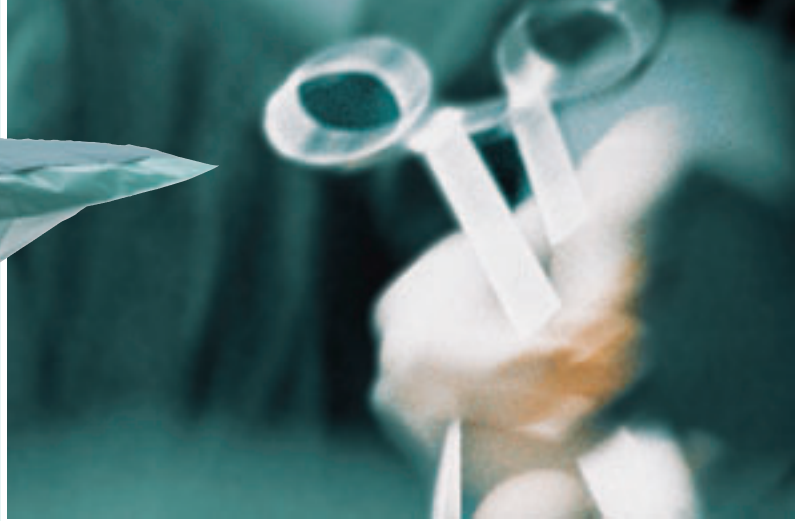

A light nonwoven material, fluid and alcohol repellent, breathable with comfortable wearing properties.

Mediwell soft

A nonwoven material that is particularly similar to textiles, fluid and alcohol repellent, breathable with comfortable wearing properties.

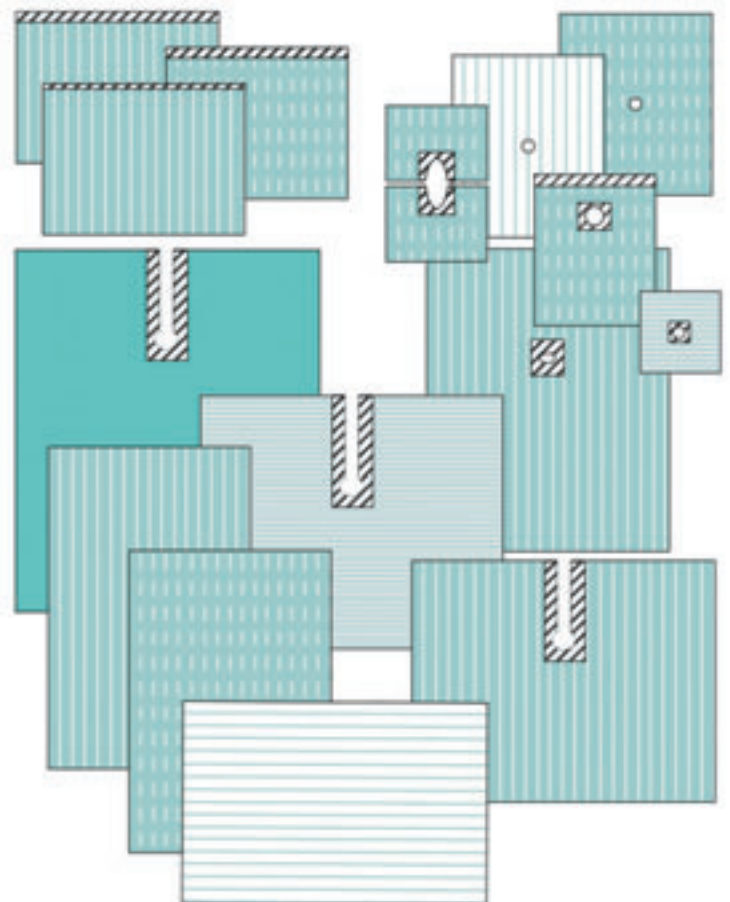

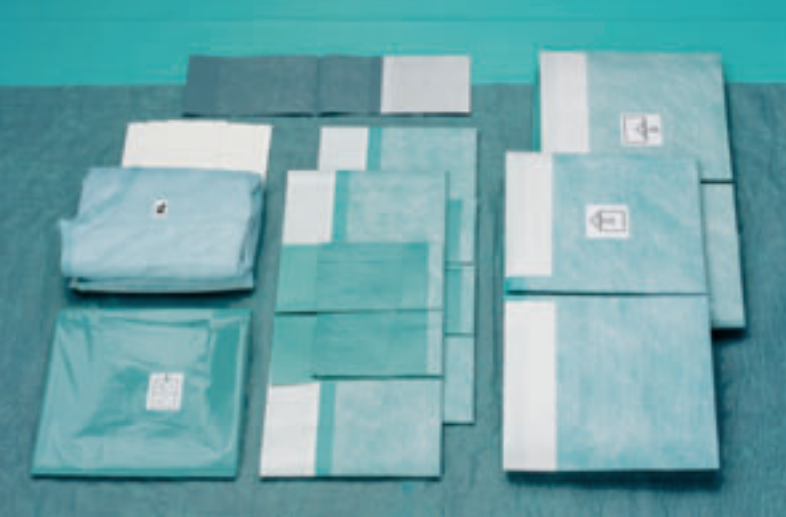

Universal Drapes

Plain drapes
Fenestrated drapes
Split sheets
Table covers

Variety is Key in our Range

Our extensive range of universal drapes and table covers in the widest choice of materials and sizes guarantees you maximum flexibility. It doesn't matter for which procedure: we offer you the quality you need. Our selection includes an extensive palette of Mayo stand covers, from light models for ambulant procedures to the specially reinforced version for operations with a high fluid incidence and/or heavier instruments. We provide back table covers of many sizes so that the optimum fit for your needs is always available.

General Surgery

Universal packs

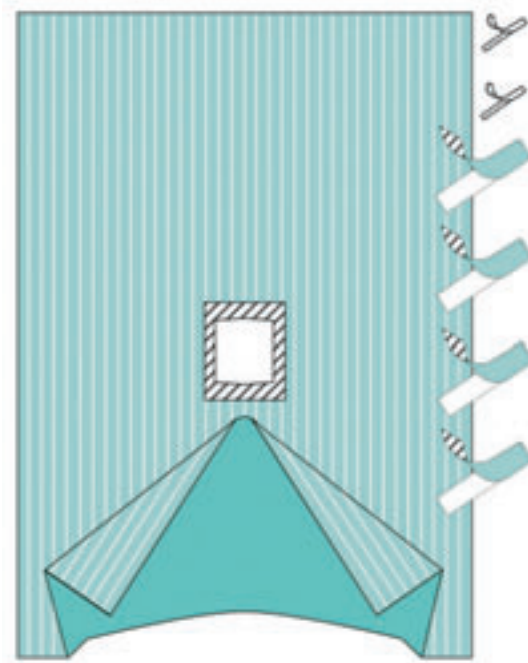

MIS drapes

LAP drapes

Strumectomy packs

Split sheet packs

Rectum drapes

Visceral surgery solutions

Our range includes a variety of classical four-drape universal packs which can be used for all visceral surgery procedures from appendectomies to whipple operations.

For difficult positions, for instance in minimally invasive procedures, special drapes are available.

These single drape systems shorten the preparation time significantly and make life easier for the OR team by user friendly handling during application. The patient is optimally protected.

Heart, Thorax, Vascular Surgery

Cardio-thoracic drapes

Split sheets with perineal drape

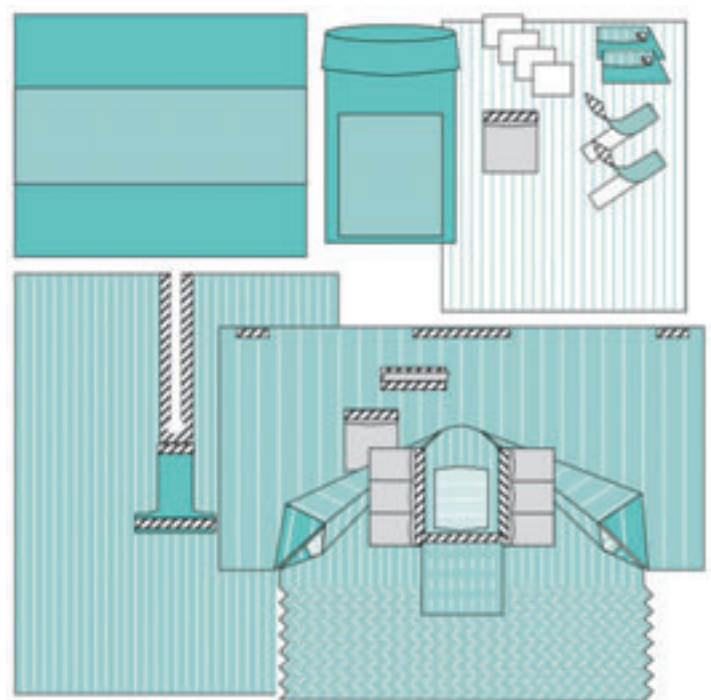

Angiography drapes

Cardiovascular Solutions

Our cardiovascular pack satisfies the high requirements of cardiosurgery. Drapes are available that are specially configured for the most diverse methods.

The split sheet with perineal drape offers a flexible system for bypass and vascular surgery.

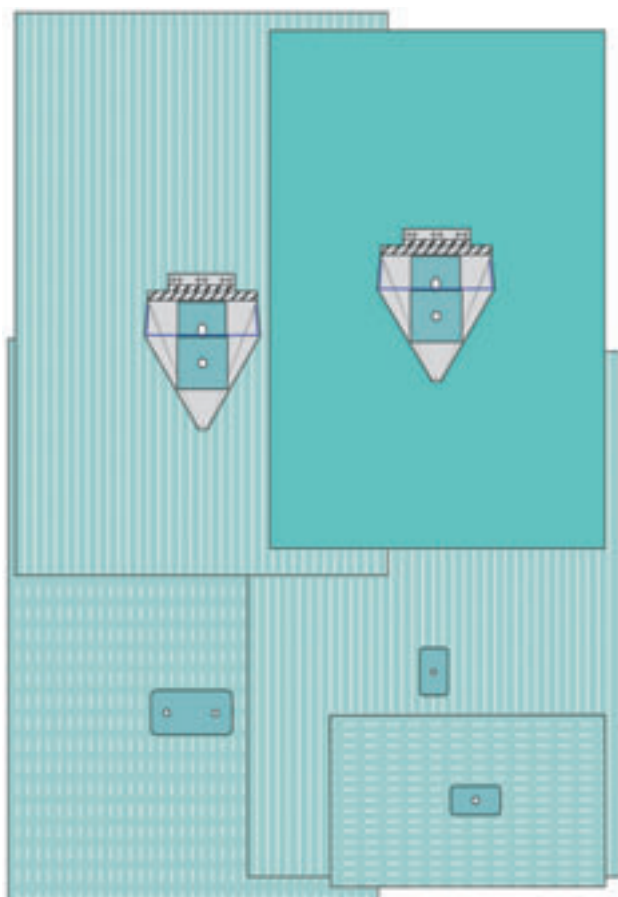

In the area of angiography drapes we reach the highest degree of safety by the use of Mediwell absorb with optimum fluid control.

Orthopaedics/Traumatology

Arthroscopy packs
Extremity packs
Hip packs
Hand surgery drapes
Vertical isolation drapes

Orthopaedic/Traumatological Solutions

Arthroscopy drapes, with and without fluid collection pouches, are available in a choice of models.

In addition a wide range of very different arthroscopy drape packs is available.

Extremity packs with a variety of elastic inlet sizes give you a good choice of flexible alternatives for use with hand or foot procedures.

Decide on the Secu-Drape® hip pack in the highest premium quality for prothesis.

The three-dimensional T-drape format of the hand drapes ensures safe and time-saving patient draping.

Vertical isolation drapes with various sizes of incision film offer great flexibility. The pre-applied diathermy pouches and tube holders meet the OR team's need for convenience.

Gynaecological Solutions

The configuration of our C-section drapes is especially designed to fit the particular anatomy of a mother just before childbirth. A large fluid collection pouch ensures optimum fluid control. Various models are available to suit different operating positions.

There is also a choice of different drapes with or without integral leggings for other abdominal procedures.

The Secu-Drape® GYN pack enables simple and safe application of the GYN drape.

The GYN/LAP drape was developed for use in demanding minimally invasive operations with vaginal access.

The GYN/CYST pack is the perfect choice for minor procedures.

Gynaecology/Urology

C-section packs

GYN packs

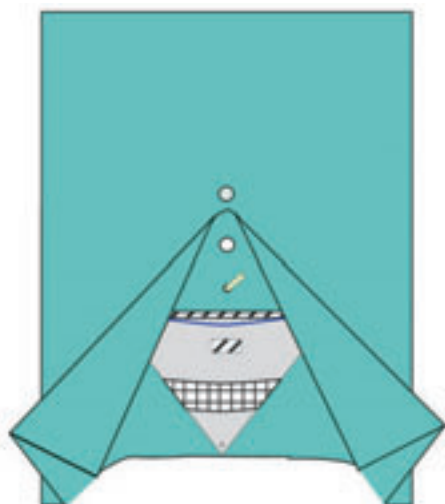

GYN/LAP drapes

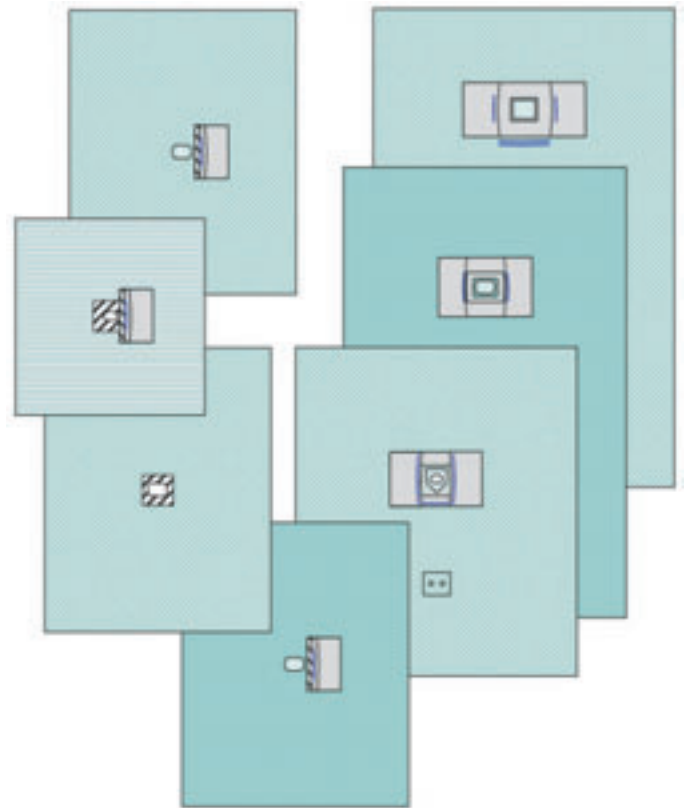

TUR drapes

Urological Solutions

TUR drapes are available in various models, in different materials, with and without fluid collection pouch.

All the drapes can be supplied with latex-free finger cots.

Neuro Surgery/ENT/ OMS^{*}/Ophthalmology

Drapes for flexible use.

Innovations with wits

For the various disciplines in head surgery Sengewald has developed a wide range of versatile drapes.

The neuro surgery drape offers the patient and the surgical team the highest degree of safety by the additionally reinforced incision area. It features a generous fluid collection pouch as well.

There is a wide selection of ophthalmology drapes in various sizes and materials with different features to optimally cover all requirements in this area.

The turban drape can be used in all procedures around the face – it can be used with absolute flexibility.

(* Oral and Maxillofacial Surgery)

Paediatrics

A huge help for tiny patients.

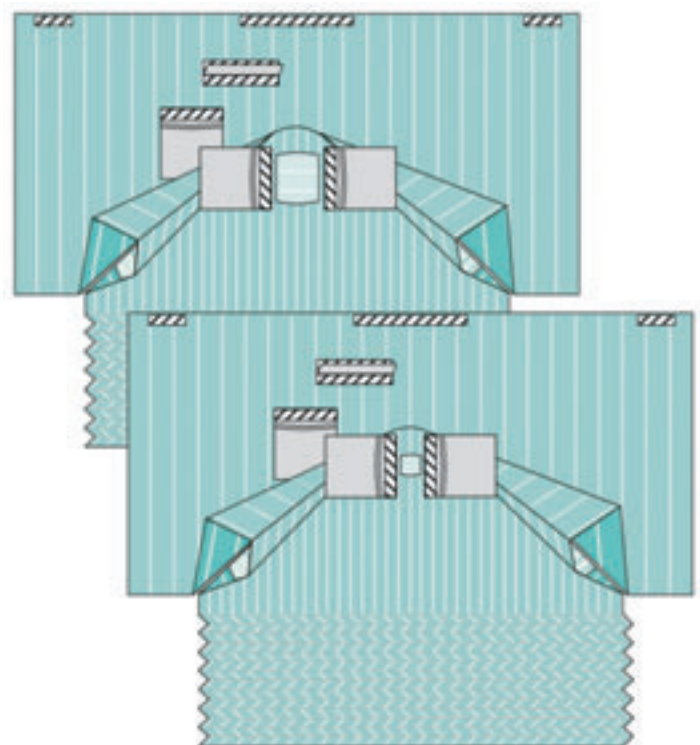

Applications for children made easy.

To satisfy the special quality requirements of child surgery, Sengewald offers an extensive paediatric range with particularly skin-friendly adhesive and narrower adhesive areas especially adjusted to children's skin.

The Secu-Drape® paediatric range includes a universal packs, extremity drapes, children's stockinettes and paediatric split sheets.

We have developed angiography drapes especially for small children and babies.

Cardiosurgery drapes with different-sized incision films round off our range for small children and babies.

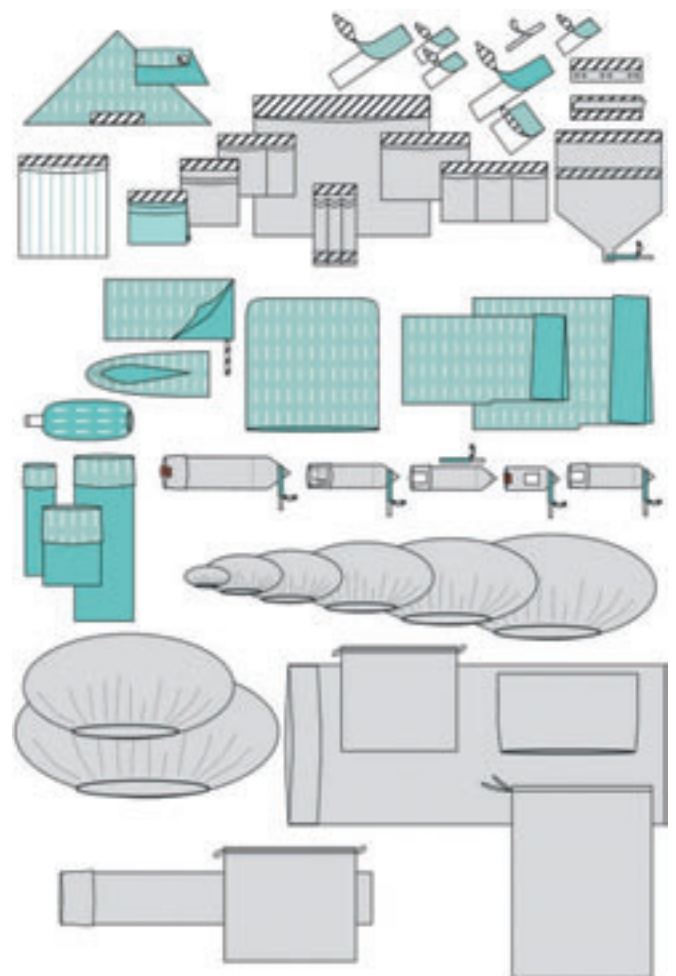

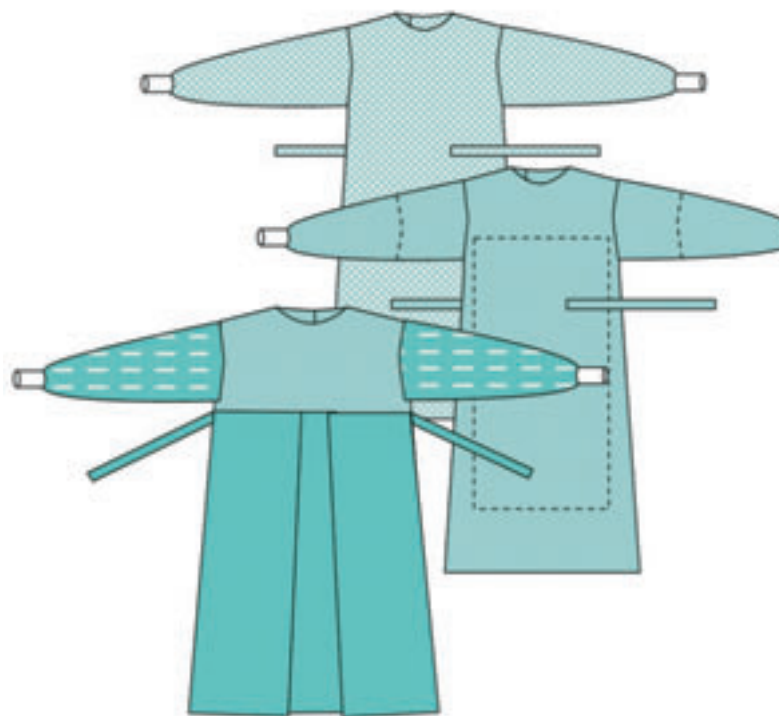

Supplementary Products

All-round supplies for the OR.

Comprehensive accessories:

- Diathermy pouches in various sizes and configurations
- OR tapes in many different materials and sizes
- Image intensifier covers for all common X-ray machines
- Versatile range of camera tube covers with differing folding schematics
- Equipment covers in many sizes
- Armrest and stool covers
- A wide choice of materials and sizes in stockinettes and leggings

OR Gowns

Solutions galore.

Maximum safety with minimum effort

We also designed our range of gowns in accordance with our Secu-Drape® "safety first, comfort and flexibility" philosophy.

Our OR gowns fulfil the most diverse requirements under the European standard and offer, depending on the planned procedure, maximum safety for OR staff and patients.

All of the gowns are latex and PVC free.

The variety of different materials and models gives you the possibility of choosing the right gown for every procedure.

Mediwell soft®

Made of polyester-reinforced cellulose nonwoven, these gowns are distinguished by their great similarity to textiles. They are breathable and very comfortable to wear due to the softness of the material.

The material is low-linting and offers resistance to fluid penetration.

Mediwell light®

Made of polypropylene SMMMS nonwoven, these gowns are distinguished by great wearing comfort with breathability.

A new sealed seam technique ensures maximum protection.

Protection Products

Hygienic safety for staff and visitors.

No Chance for Bacteria

Sengewald protection products for staff and visitors enable the strictest hygiene standards to be met in the entire hospital.

Scrub Suits

OR clothing made of soft nonwoven material offers the OR team the greatest wearing comfort.

Jackets made of various materials and with different arm lengths are available in accordance with individual preference.

Protective Coats

Our protective coats offer hospital staff and visitors protection from transmitting bacteria.

Examination Couch Covers

The layer that is impermeable to fluids is up to the highest hygienic requirements.

The peel direction enables safe sterile extraction.
