

Cost effective solutions for office-based procedures

WASTE REDUCTION

Switching from re-usables to single-use instruments can lead to an 80-90% reduction in solid, clinical waste.

Gloves, tissue, wraps, polythene, detergents, disinfectants, solvents and plastics all end up as waste products during each cleaning and sterilization cycle, and all have serious implications for the environment.

INFECTION CONTROL

Single-use instruments have zero risk of disease transmission. Therefore, they reduce the sequelae of infection and disease, which together produce environmentally dangerous waste.

DISPOSAL

All batteries used in OfficeSPEC light source are landfill friendly and can be disposed of with medical waste.

Office SPECTM

Premier Speculum for
In-Office Procedures

OBP Medical is proud to offer the first open sided, disposable, speculum to the in-office medical community. For single use only, the OfficeSPEC eliminates the time and expense of reprocessing and reduces the chance of cross-contamination in the medical setting. With an open side for improved instrument access and easy removal, the OfficeSPEC also features a built-in hands free light source and smoke channel. Smoke channel Xmas tree adapter is sold separately for connection to any size evacuation tubing. (Item # C020003). A must have instrument for office based procedures. (OfficeSPEC also available without light source).

ORDERING INFORMATION

- Item # C020001 (with light)
- Item # C020002 (without light)
- Sold in boxes of 24
- All OfficeSPEC come non-sterile and are latex free.
