

STERILE RELEASE CONTROL module

quality tool

In a busy workplace of a sterilizing department the MEDITRAX® Sterile Release Module is positive identification that sterile packs have undergone their final quality check and release.

This minimizes the potential of inadvertent use of unchecked or potentially unsafe products by the hospital community, thus ensuring patient safety.

This is accomplished by the application of a final quality check label visually identifying released packs.

features : staff tracking

manual recording

components

The MEDITRAX® Sterile Release Control Module includes :

Qty	Description	Code
1	MEDITRAX® label applicator	MHG1800
